

Serial No: 09/475,165

Attorney Docket No.: 1999-0300

**CLAIMS**

1-21. Canceled.

1           22. (Previously Presented) A method for providing calling services on a  
2 residential PBX, comprising the steps of:  
3           determining if an incoming call to a called number has a POTS address, and if so,  
4 converting the POTS address to an Internet Protocol address;  
5           determining whether the caller desires to access residential PBX calling features  
6 and if so, implementing the residential PBX calling features, otherwise routing the  
7 incoming call to the Internet Protocol address;  
8           determining if the called number has residential PBX calling features engaged,  
9 and if so, routing the incoming call according to the engaged residential PBX calling  
10 features;  
11           determining whether the caller has authorization to access the residential PBX  
12 calling features;  
13           rejecting the caller if the caller does not have authorization to access the  
14 residential PBX calling features; and  
15           allowing the rejected caller to enter another called number after attempting to gain  
16 authorization to the residential PBX calling features.

23-24. Canceled
